

**March 2022**

### **Meeting Info**

Our next meeting is on **April 13th**.  
Jason Geiser will be demonstrating tool and tool handle making.

### **Club Challenge**

This year, we will have 2 challenges per month.  
The challenge for the April meeting is to turn an open vessel or square bowl.  
Bring your challenge pieces for an entry in the monthly and yearly drawings.

## **Treasurer's Report**

Monthly Revenue: \$85.00 (\$30.00 from Annual Dues and \$55.00 from Amazon Smile)

February Expenses: \$0.00

Current Balance: \$5168.99

Remember to place your Amazon orders through <https://smile.amazon.com> It's FREE. Select **Portneuf Valley Woodturners Association Inc.** as your charity. We received \$55.00 for the first quarter of 2022. Thanks, that puts us on a trajectory to exceed our 2021 earnings

### **2022 Membership Dues**

**We will begin accepting Membership Dues for 2022 at the next meeting. Dues are \$30/year.**

# President's Message

Happy spring! Thanks to all who attended for the great honest and candid discussion at last month's meeting. Apologies to Tracy for no pictures, He asked me and I failed him. I think we all kind of got caught up in a great discussion. It was so great to see such a diverse range of projects on the table. Thank you everyone who brought something to show. I see improvements and broadening of skills and types of projects by each of you. Congratulations. Before the snowbird and recently retired forester Dennis left for warmer climes, he expressed an interest in seeing either a short slide show type presentation, or movie of each member's shop. In the comradery that we all share and love to share with others; like the discussion last month, perhaps we could learn something or at the very least ask questions of fellow members about the how and whys of their shop. Please be thinking about how to demonstrate your shop to your fellow members in a future meeting, perhaps with a description of its evolution. I'll also be asking again for volunteers to demonstrate. Dan did an amazing job on the multi axis candle holders. Not just in the quality and craftsmanship, but also in making them match. I don't know which of you have attempted multi axis turning, but it's not easy to do one. Let alone a matching pair. Great job Dan! Is there a demo in your future? Happy turning, and see you next month for a demo by Jason Gieser on tool and tool handle making. Jason is a great demonstrator. You don't want to miss this!
